The battery-driven power package for large bone surgery

The Madrimed VINCI 600 is the world's first power instrument with Li-Ion battery, making it the most powerful and, at the same time, most lightweight operation instrument for all applications in large bone surgery.

With its anatomically and ergonomically shaped handle, surgeons no longer need to actively hold the VINCI 600 power instrument - it literally lies in their hand.

vinci
600

The VINCI 600 guarantees:

- **Li-Ion technology – No memory effect**
- **Approved for thermal disinfection and cleaning**
- **Lubricated for a lifetime – No maintenance or service**
- **Low total weight – No fatigue**

As far as sterility, ease of use and safety are concerned, the VINCI 600 ensures absolute reliability for the patient and all clinic personnel.

- Universal application options and maximum mobility for all applications in large bone surgery
- Highest levels of precision, the result of extremely low weight and fully-variable speed control
- Absolute reliability and more energy through Li-Ion battery technology
- No fatigue of the surgeon's hand due to anatomic, ergonomic shape
- Cost-efficient, universal application through modular design. A single instrument with a series of attachments.
- The Art of European Engineering
